

# The Big Picture

## Creative Teambuilding Session

### Enhance communication and collaboration

In *The Big Picture*, teams collaborate and communicate to create an interconnected multi-tile piece of art reflecting your team's vision and values. Everyone knows that, from time to time, it is important to step back and look at the Big Picture, particularly when looking at an organization and how its people operate and communicate internally. In this creative teambuilding activity, the importance of teamwork, cooperation and communication is reinforced through the process of painting an artistic creation of truly epic proportions.

### Teambuilding Objectives and Outcomes

- Create an image that represents something meaningful to the team or organization
- Collaborate and communicate effectively to ensure a quality end product, and share their pride together
- Realize the success and quality of their picture depends on their ability to cooperate rather than compete – which is true for their work within the organization, as well
- Break out of normality to work loosely and expressively together
- Learn to step back and look at the bigger picture in their day to day routine

### Giving you and your team the performance edge
